Jivit Rana

Last updated in April 2026

Data Analyst | Tableau Developer | Data Analytics & Visualization | AI/ML Engineer

jivit.rana2024@nst.rishihood.edu.in +91 748 321 8396 Delhi, India **Portfolio** LinkedIn GitHub LeetCode

Professional Summary

Data Visualization Analyst with hands-on experience building end-to-end analytics platforms and Tableau dashboards spanning fraud detection, hospitality demand, AI conversation intelligence, and student performance prediction. Strong in Python, SQL, and machine learning with a focus on transforming raw datasets into executive-ready insights, interactive dashboards, and deployed ML applications.

Technical Skills

Languages: JavaScript (ES6+), Python, SQL (PostgreSQL, MySQL), HTML5, CSS3

Data Analytics & Visualization: Tableau, Google Sheets (Pivot Tables, Slicers, KPI Dashboards), Matplotlib, Seaborn, Pandas, NumPy, Excel, Data Cleaning, Feature Engineering, EDA

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM, Google Sheets API, Real-time Databases

AI/ML & GenAI: Scikit-learn, XGBoost, LangChain, LangGraph, RAG, Fine-Tuning (LoRA, QLoRA), Transfer Learning, TensorFlow, Transformers, LLM Integration, NLP

Frontend & Backend: React.js, Next.js, Node.js, Express.js, FastAPI, Streamlit, Tailwind CSS, REST APIs, JWT, OAuth 2.0, WebSockets

Featured Projects

WildChat Analytics Platform | Live Dashboard — Apr 2026

- Built an end-to-end analytics platform processing **1M+ real-world AI conversations** from the WildChat dataset, covering the full pipeline from raw ingestion to executive-ready Tableau BI dashboards
- Implemented a **Python ETL pipeline** with NLP-based preprocessing — language detection, intent classification, toxicity scoring, and topic modeling — transforming unstructured chat logs into structured analytical signals
- Delivered multi-page Tableau dashboards covering **behavioral segmentation, safety monitoring, model usage patterns, conversation quality trends, and geographic distribution**, enabling operational intelligence across the dataset
- **Stack:** Python, Jupyter, NLP, Tableau, Behavioral Segmentation, Safety Analytics, ETL, CSV Data Modeling

Hotel Booking Analytics Dashboard | Live Dashboard — Apr 2026

- Developed a multi-page **Tableau dashboard** analyzing hotel booking demand patterns, cancellations, customer segments, seasonal trends, and revenue performance across multiple hospitality dimensions
- Designed interactive KPI reports covering **booking conversion, cancellation behavior, ADR trends, lead time analysis, market segments, customer types, and occupancy insights**, enabling data-driven revenue and capacity planning
- Paired Tableau dashboards with **Python-based EDA and ML notebooks** for feature engineering, correlation analysis, and predictive modeling of cancellation likelihood
- **Stack:** Python, Jupyter, Machine Learning, Tableau, KPI Design, Hospitality Analytics, Dashboard Storytelling, CSV Data Modeling

AI Study Coach — Student Performance Prediction | Live App — Jan 2025

- Developed an end-to-end student performance prediction system using multiple ML algorithms — **Logistic Regression, Decision Tree, Random Forest, and XGBoost** — enabling early identification of at-risk students for timely intervention
- Built a comprehensive **Jupyter-based analysis pipeline** covering data preprocessing, EDA, feature engineering, model training, cross-validation, and comparative evaluation with metrics and visualizations
- Deployed a **Streamlit interactive UI** for real-time pass/fail predictions, model comparison, and actionable performance insights accessible to educators and administrators without technical expertise
- **Stack:** Python, Scikit-learn, XGBoost, Pandas, NumPy, FastAPI, LLaMA, Streamlit, Jupyter, Machine Learning Deployment

Loomage — AI Image Generation Platform | Live App — Jan 2025

- Built a full-stack **AI-powered image generation web application** using the MERN stack, integrating a generative AI model API to convert user text prompts into high-quality images in real time
- Designed a responsive React.js frontend with prompt input, image gallery, and download functionality; engineered a Node.js/Express.js backend handling API orchestration, authentication, and image storage via MongoDB
- **Stack:** React.js, Node.js, Express.js, MongoDB, GenAI API, Tailwind CSS, REST APIs

Awards & Certifications

4X Hackathon Winner | Decode Hackathon, Data Heist, Apex Hackathon, Vibe Code Hackathon — 2024 – 2025

Supervised Machine Learning: Regression and Classification | Coursera (DeepLearning.AI) — 2024

- Learned linear and logistic regression, gradient descent, regularization, and model evaluation; gained hands-on experience implementing models in Python with NumPy and Scikit-learn

Education

Newton School of Technology, Rishihood University — Sonipat, Haryana — 2024 – 2028

B.Tech in Artificial Intelligence & Machine Learning (Dual Degree) **CGPA: 7.7 / 10.0**
